WORK EXPERIENCE

Team Lead, Web Development
NewAge

01/2022 - Present   *American Fork, Utah*

Achievements/Tasks

- Develop new features, integrate APIs, and fix high-priority bugs in our web applications using Vue, Laravel, Perl, SQL, Angular, Node, and jQuery.
- Manage a team of four other developers by assigning tasks, mentoring, reviewing code, and running Agile meetings.
- Interview and hire new developers

Web Developer
NewAge

02/2021 - 01/2022   *American Fork, Utah*

Achievements/Tasks

- Built the new company website in a team that combined multiple companies into a single site that services many global markets using Vue, Laravel, SCSS, PHP, JavaScript, HTML, and Perl.
- Maintained both backend and frontend code and fixed any issues that arose.
- Assisted team with code reviews before deployment.
- Fixed code, created new features, and deployed company's Slenderiiz application using Angular, JavaScript, CSS, Node.js, and MongoDB.

Freelance Web Developer
Create Room

12/2020 - 11/2021

Achievements/Tasks

- Created a new home page for Shopify website using Javascript, JQuery, CSS, HTML, and liquid.
- Integrated third party API (Bread) for estimating finance payments.
- Helped implement Vue.js in the /products/dreambox page.
- Moved the codebase to GitHub and helped implement the workflow for deploying to Shopify.
- Helped fix various bugs throughout the site.

SKILLS

MySQL   Angular   Agile   MongoDB   Git

Vue.js   Laravel   SQL   HTML   CSS

JavaScript   Node.js   React   Redux

PostgreSQL   Python   Knex.js   SCSS

PROJECTS

NewAge Company Website - newage.com (02/2021 - Present)
- Tech stack Laravel, Vue, PHP, SCSS, HTML, JavaScript, and Perl.
- The website consists of a shop, enrollment application, and company section with several company pages.
- I helped build the enrollment process, part of the shop, and several company pages.

Slenderiiz - https://slenderiiz-challenge.com/ (website is only active during active challenges) (09/2021 - 10/2021)
- An exercise challenge website where users submit a challenge form and administrators can look at submitted forms to pick a winner. Built using Angular, Node, and MongoDB
- Fixed a lot of bug issues in both the frontend and backend and implemented some new features.
- Backed up the database and cleared old data in preparation for new challenges.

EDUCATION

Web Development
Lambda School

04/2019 - 08/2020

Courses

- Web Fundamentals (HTML, CSS)
- Web API (Node.js, Knex.js, Sqlite3, PostgreSQL)
- Web Applications (JavaScript, React)
- Computer Science (Python, Data Structures)

Bachelors of Science in Exercise Science
Brigham Young University

09/2011 - 12/2016   *Provo, Utah*
